SUMMARY

Final year Computer Networks & Security student with full-stack development experience across React.js, Node.js, and PostgreSQL, plus enterprise ERP development as a SAPUI5 Developer Intern. Independently designed, built, and deployed multiple production web applications, including a real world ecommerce ordering platform and an AI powered document processing tool on Microsoft Azure. Available immediately for an onsite Full Stack Developer role or internship in Karachi.

TECHNICAL SKILLS

Frontend: React.js (Vite), JavaScript (ES6), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js (working knowledge), Azure Functions, RESTful API Development

Database: PostgreSQL, Firebase

Auth & Cloud: Firebase Authentication, Microsoft Azure, Vercel

Tools: Git, GitHub, VS Code

EXPERIENCE

SAPUI5 Developer Intern - iSoftMart Solutions *May 2025 - Aug 2025*

- Built and maintained responsive SAPUI5 UI components for ERP modules used in daily business operations
- Designed form based data entry interfaces to streamline internal workflows
- Integrated frontend views with a PostgreSQL backend, improving data binding performance and reducing UI lag
- Collaborated directly with senior developers to debug production issues and refine user experience

Business Developer - Sales & Client Relations - Artex Digital *Dec 2023 - Feb 2025*

- Liaised with clients to scope requirements and translate them into digital solutions, strengthening client-facing communication skills relevant to technical requirement-gathering

PROJECTS

Pizza Run - Ecommerce Web Application *Mar 2026*

Tech Stack: React.js (Vite), Tailwind CSS, JavaScript (ES6), WhatsApp Business API, Vercel

- Built a responsive, mobile first ecommerce ordering platform for local businesses with real time cart state management
- Engineered a checkout flow that auto generates a structured WhatsApp order payload for instant merchant notification, removing the need for a separate order management backend
- Deployed on Vercel with continuous delivery and optimized load performance

AI Resume Analyzer - Cloud Based Web Application *Jan 2025*

Tech Stack: React.js (Vite), Tailwind CSS, Firebase Auth, Azure Functions (Node.js), Azure Document Intelligence, Azure Static Web Apps

- Built a full stack application that parses and analyzes resumes using the Gemini API and Azure Document Intelligence for PDF extraction
- Implemented Firebase email/password authentication and deployed the full stack on Azure Static Web Apps

GitHub: <https://github.com/Umer-1911/recruitx.ai>

DevFlow Dashboard - Interactive Web Dashboard

- Built a React.js dashboard with reusable, componentized layouts focused on responsive design and UI clarity
